HW00

Я случайно неправильно прочитал задание, и сделал без wireShark и ВМ. Год назад я собрал себе сервер с линуксом, специально для таких задач, и поэтому просто сделал скриншоты с консоли.

Сервер

```
[admin@babushkin05server hw00]$ java -cp target/classes org.cn.Server
Server started on port 10000
Client connected
Received from client: Hello server 1
Received from client: Hello server 2
Received from client: Hello server 3
Received from client: Hello server 4
Received from client: Hello server 5
Received from client: Hello server 6
Received from client: Hello server 7
Received from client: Hello server 8
Received from client: Hello server 9
Received from client: Hello server 10
Received from client: Hello server 11
Received from client: Hello server 12
Received from client: Hello server 13
Received from client: Hello server 14
Received from client: Hello server 15
```

Клиент

```
[admin@babushkin05server hw00]$ java -cp target/classes org.cn.Client
Connected to server
